Matt Groening the multiple-E Emmy Award winning creator and executive producer of THE SIMPSONS, rockets into the next millennium with his new, visually rich animated series FUTURAMA. We're not in Springfield anymore. We're in New York City, a thousand years from now, and its like no future you've ever imagined.

Fry is a 25-year-old pizza delivery boy whose life is going nowhere. When he accidentally freezes himself on December 31, 1999, he wakes up 1,000 years in the future and has a chance to make a fresh start. He goes to work for the Planet Express Corporation, a futuristic delivery service that transports packages to all five quadrants of the universe.

His companions include the delivery ship's captain, Leela, a beautiful one-eyed female alien who kicks some serious butt-despite her depth perceptions and Bender a robot with very human flaws including but not limited to, drinking, smoking, kleptomania and a penchant for robot pornography (which consists mainly of circuit diagrams).
